

## Household IoT Privacy Settings

Please read the description of the following privacy-setting profiles and select **one** profile that matches your privacy preference as much as possible. You can change individual settings in the profile on the next screen.

### Enable All

Allow data to be collected, used, stored and shared without restrictions.

### No Sharing

Allow data to be collected, used, and stored without restrictions but disable third party sharing.

### Local Storage Only

Allow data to be collected and used without restrictions but disable remote storage and third party sharing

### No Tracking

Allow all, except location and presence tracking data, to be collected, used, and shared without restrictions.

### Disable All

Do not allow any data storage and sharing.  
Turn off all smart home functionalities.

Read the description and choose your favorite profiles. You can click on the profile, and make further changes.
